Professional Summary

Computer Science Engineering undergraduate with expertise in Artificial Intelligence, Machine Learning, Cloud Computing, and Distributed Systems. Experienced in designing scalable full-stack, DevOps, and data-driven applications with a focus on efficiency, reliability, and automation. Passionate about building production-ready systems and pioneering advancements in next-generation computing architectures.

Education

SRM Institute of Science and Technology, Chennai

June 2023 – May 2027

B.Tech in Computer Science and Engineering

CGPA: **9.76**

Class XII (CBSE): 75.4%

2022

Class X (CBSE): 82.8%

2020

Language Proficiency: English (Professional), German (Basic), Urdu (Native), Hindi (Native).

Technical Skills

Programming Languages: Python, C++, Java, JavaScript, C

AI/ML & Data Science: TensorFlow, Scikit-learn, Pandas, NumPy, MLflow, Exploratory Data Analysis (EDA), Data Visualization, Tableau

Backend Development: FastAPI, REST APIs

Frontend Development: React, JavaScript, HTML, CSS

Databases: MySQL, Database Design, SQL Query Optimization, Relational Database Management Systems (RDBMS)

Cloud & DevOps: AWS, GCP, Docker, Terraform, Ansible, Jenkins, GitHub Actions

Monitoring & Observability: Prometheus, Grafana

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Architecture

Developer Tools: Git, GitHub, VS Code, Figma

Professional Experience

Universiti Sains Malaysia (USM), Malaysia

Nov 2025 – Present

Research Internship (In collaboration with SRMIST Chennai)

- Conducting research on Metaverse architectures, Cloud-Edge-Fog Computing, and scalable virtual environment systems
- Researching low-latency communication, distributed computing, and performance optimization techniques for immersive applications

R.M.C., Chennai

Jan 2025 – Present

Event Member

- Contributed to educational and community outreach initiatives
- Coordinated cross-functional activities to improve engagement and event delivery

SOCH Beyond The Imagination, Aligarh

June 2025

NGO Volunteer

- Participated in grassroots educational and social initiatives
- Conducted AI awareness sessions, educating students on emerging technologies, career opportunities, and real-world applications of AI.

Project Experience

Optimizing Data Transmission Latency in Cloud–Edge–Fog Architecture for Metaverse Applications

- Researched Cloud–Edge–Fog architectures to minimize latency and improve real-time data processing for Metaverse environments.
- Analyzed distributed computing and resource management strategies to enhance scalability, responsiveness, and user experience.

AWS Organizational Unit & Control Tower Automation with DevOps Portal

- Automated AWS organizational setup and governance using Terraform, Ansible, and AWS Control Tower.
- Developed a full-stack DevOps portal with CI/CD automation, deployment tracking, and observability using GitHub Actions, Prometheus, and Grafana.

Customer Relationship Management (CRM) Dashboard

- Built a CRM analytics platform for customer segmentation, transaction analysis, and value prediction.
- Implemented machine learning lifecycle management with MLflow and automated deployment pipelines using Jenkins.

Advanced Stock Prediction with Sentiment Analysis

- Developed a stock forecasting platform combining machine learning models with real-time market data analysis.
- Improved prediction performance through sentiment analysis of financial news and interactive visualization dashboards.

SRM Findr

- Designed and developed a full-stack web application that enables students to report, search, and recover lost and found items within the university campus.
- Leveraged Next.js, React, Supabase, PostgreSQL, Tailwind CSS, and Framer Motion to deliver secure authentication, real-time data management, and an enhanced user experience.

Certifications

Global Certifications

SAP | Back-End Developer – ABAP Cloud

Apr 2026 – Apr 2027

- Credential ID: 2ac0861f-e206-4986-9dd8-93d176aaaf8a
- Validated expertise in ABAP programming, RAP model, Clean Core principles, and SAP S/4HANA extension development

Course Certifications

- AWS Academy Graduate (Cloud Development, Cloud Security, Data Engineering, Generative AI)
- AWS Well-Architected Proficient
- Red Hat OpenShift Development I: Containers with Podman (DO188)
- Cisco Networking Basics
- C++ Programming (Udemy)
- Google Cloud Skills Boost
 - Google Cloud Engineering Certificate
 - Build Infrastructure with Terraform on Google Cloud
 - Develop Your Google Cloud Network
 - Implement Load Balancing on Compute Engine
 - Set Up an App Dev Environment on Google Cloud

Leadership & Extracurricular Activities

- **Technical Team Lead:** Led cross-functional project teams, coordinated development activities, and drove successful project execution across academic and innovation initiatives.
- **Head Boy:** Represented the student body, managed institutional events, coordinated with faculty and administration, and led student governance initiatives.
- **Academic & Event Representative:** Facilitated communication between students and faculty, organized academic activities, and supported the execution of technical and institutional events.
